It waves that your sons may be free; Will you strike no blow to defend? God help you, if such men you be!

#### On Probation

TERBERT HOOVER, in response to a letter of inquiry from Senator Nelson, assures the latter that the Federal government has no intention of taking over immediately the country's industries when the food control bill is enacted. This action will depend on the conduct of said industries. the law, there will be no necessity for taking that step to protect the public from greed. The purpose of the pending legislation is not to eliminate private control, but to so regulate its power as to prevent exploitation of the public. In other words, big and little business alike having to do with foodstuffs distribution will be put on good behavior, in default of which they will be dealt with.

If Austria doesn't quit changing its Cabinet so often, it will have to take men from its army to fill the vacancies in Vienna.

### "Tote 'Em Yourself"

66THE merchants of Richmond, Va., have done brave service to the need for war economy. By adroitly drafting that good old Saxon word 'tote,' they have injected homely vigor into a campaign which needs energizing," says the Chicago Herald.

We accept the compliment on behalf of our merchants, and we promise our contemporary that our people will heed the injunc-Of course, we do not expect them to tote barrels of flour home or otherwise burden themselves, but they will readily see the economy of carrying away from our stores the smaller packages, reducing the volume of the expensive and wasteful delivery ser-

Toting our bundles home is only one manifestation of Richmond's willingness, yes, eagerness, to contribute what it may to the country's needs. Witness our Liberty bond investments, our Red Cross subscriptions and our endless garden plots. We have turned our back on no appeal which our government has made, and we shall turn our back upon none.

Getting wheat from Uncle Sam for the purpose of trading it to Germany may be a fair exchange for the neutral, but it is highhanded robbery of the wheat producer.

## A Pang to Soldiers' Wives

THE news that the War Department has asked the State Department not to issue passports for Europe to women relatives and friends of the troops who are to be sent to France has brought a disturbing emotion to many a woman's heart. When Pershing's men were about to sail, the wives, mothers and sweethearts of the troops bombarded the department to get permission to go to Paris, so as to be able to see their menfolks on leave of absence.

No person can journey to the warring countries in Europe without a passport, and the department is convinced that nothing would do more to demoralize the American troops than the temptation to run over to Paris every week-end to see their womenfolks. Many of the troops in their first months' services are sure to be attacked by homesickness, and a man's home is wherever the woman he loves is. This taking the American army to a foreign land to fight has already become one of the emotional sacrifices of the war, and it will grow with the months, and the women will have to bear the burden of it, for the men will be in action. But there is no woman who knows better how to bear it than the American woman. She never murmurs over her duty.

The United States Attorney-General says that all the German-Americans have to do is to obey the law and keep their mouths shut. It will require a strict enforcement of a stringent law to make them do the last.

# A Dearth of Doctors

THE complaint comes from a number of communities in Virginia that the family physicians are being called away for military training, and the people are being left without adequate medical service. In one community there was no physician at hand to attend a man ill with typhoid fever, and the physicians in the adjoining neighborhood were too overworked and ill to travel.

The government has been criticized quite severely by some medical writers for not more promptly calling out the doctors for military training. It is absolutely necessary that a general practitioner undergo a thorough training to become an efficient army physician | cruelty to animals,

or surgeon, and the training requires time. But from reports it appears that the government has called some of the doctors to train without having made provision for a redistribution of the profession so as to safeguard the public health. There is a sufficient number of doctors for both home and military services, and every man in the profession should at once be registered by the government and all doctors needed for the army and the Red Cross should be chosen by select draft. The government and the Red Cross will learn whom and where to take and whom and where not to take, and no community would then be without a doctor.

The Chicago Tribune says, "Let an orchestra strike up 'The Star-Spangled Banner' and Southerners will leap to their feet." do, they do, but let an orchestra strike up "Marching Through Georgia" and they will leap at the fiddlers.

#### Our Alien Problem in War

G ERMANY has honeycombed America with spies. There is said not to be a town of 5,000 population in the country without its informers; every industrial community, with its output of manufactures, is kept tab upon. And the Kaiser's propaganda is passing either openly or secretly from mouth to mouth where it does not appear in print. Innocent Scandinavian sailors have carried tons of mail matter to Germany since the beginning of the war. The government has destroyed wireless stations, but they spring up again like blockade stills, and rush news is daily cabled to Berlin by way of Mexico and South America.

To meet this German espionage, the United States government has organized and is developing one of the ablest Secret Service systems in the world; it is tightening the censorship on all cables, and is stopping all other leaks it can discover. But this German danger is one that reaches beyond the power of the Secret Service and censorship to grasp. It springs from our alien problem in this war.

There are in this country 33,000,000 persons who are either foreign born or are the children of foreign parents. Over 7,000,000 of these persons first saw the light in Europe. A large per cent of these latter cannot speak English; most of them are distributed among the industrial centers of the country. They are from all the countries of Europe now at war, and they are a restless, shifting element in our population. Many of them drift from place to place looking for work and for better wages. They have not been in this country long enough to feel patriotically attached to it. With the exception of those who have come here from Ger-If they comply with the letter and spirit of | many, the war does not deeply enough interest this alien element for it to take sides. Many of these aliens can, therefore, easily and often innocently be influenced by German agents to help further the ends of Germany in this country, just as Scandinavian sailors were induced to carry German mail without suspecting the motive of the senders.

The chief danger of this element, who is to-day largely employed in turning out munitions, building camps, loading steamers for Europe and mining and transporting coal, is to be found in the event that this country should suffer a calamity or a setback in war or should it suffer a shortage of food or be cursed with serious strikes. These men and their families, under such stress, would almost certainly become tinder for German agents, and our munition factories might be crippled or destroyed. A number of them have already been blown up in mysterious ways.

The National Americanization Committee of New York has suggested what seems to be a practical solution of this alien problem. It is the organization of a central intelligence bureau for aliens with two co-ordinated services. One of these services would cover the distinctive activities of spies, plots, violations of laws, censorship and the carrying out of official orders-the repressive phase of the work. The other service would furnish information to aliens about the war in such a way as to conserve industry. It would co-ordinate instructions to aliens about enlistments, and it would direct the many efforts now being made to Americanize aliens and inculcate loyalty and love of their adopted country.

The war has already created many new bureaus, but there does not seem to be one more needed than this.

Emma Goldman's sentence of two years in prison is thought by some to be too light. But, as she will have to sperd the time in Jefferson City, Ma, the punishment will fit

#### What the Kaiser Yields THE Kaiser, in ordering a bill to be passed

in the Prussian Diet granting equal manhood suffrage to the people of Prussia, has for the first time in his career bent before the storm of democracy that is now sweeping over the world. That he has yielded anything of value depends on what sort of a law is passed and how it is executed. If Prussia is given an honest equal manhood suffrage law, it should very materially reduce the power of the Junkers in the Reichstag; it should make the ministry responsible to the Reichstag and not to the crown. It should give the Reichstag a firm grasp of the whip hand in voting war credits. The power to vote war credits is the only lash the Reichstag now has with which to threaten the Kaiser and the military autocracy, except revolution.

What effect the Kaiser's grant will have upon the war is a matter of pure speculation. There are a score of great factors in determining the course and end of the war. But whether the Kaiser and the men around him are honest or not in yielding, one thing is certain, the war has shivered the armor of German absolutism. The Kaiser will never be allowed, like his ancestor, Frederick William IV., in 1848, to break his word. All pretension of absolutism in this world of men has been punctured. The grace of God in a human crown has been sent to limbo

Russia, protesting against the taking off of Constantine, thinks that every nation should attend to its own business. If Constantine had followed the Russian idea, he might have been looking out of the palace windows in Athens to-day.

Briton has its V. C.; the United States, its congressional medal; France, the Cross of the Legion of Honor; Russia, its St. George's Cross; Germany, its Iron Cross. Belgium needs no medal or any insignia.

The Boston Transcript suggests that the Washington police untrap a few mice around the White House gates. This would be

#### SEEN ON THE SIDE BY HENRY EDWARD WARNER

A Capric Carol There's a little pet Angora-you have one of them, I'll bet!

beast that every chap you meet is trying hard to get; And no matter how you guard it, though you

watch it night and day, You are always agitated, lest your goat may

get away! O the anguished hours you worry, and the nights you steam and stew

In the fear that your pet Capra will elope away from you! And it's ten to one your worry isn't worth a

single whoop, For your little pet Angora doesn't want to fly the coop.

Every fellow's goat adores him, and would like to hang around

Till the hand that feeds him rests beneath the clover-covered ground. But somehow we all get fidgets when we see kidnapers near,

And we fret and fuss and worry with the momentary fear That some bandit, bold and reckless, may defy

our deepest moat, And, with death-defying daring, come along and get our goat!

But the truth is: if we'd think a bit, we wouldn't have to moan, For the other chap is guarding an Angora of

Therefore, brethfen, sisters, let us treat our pet Angora well;

Let us get a lot of goats, and have some extra goats to sell. erchance, our goat should wander to some big, burglarious brother.

Let us grin as if we're happy, and go out and get another! What's the use of wasting worry on a little thing like that

so long as we are eating and the children getting fat? And the purpose of this jingle is to grab care

by the throat-Here's long life to perseverance, and perdition to the Goat!

## How to Chafe a Rabbit.

(Culinary Lesson, No. 2.) Yesterday we told you how to peel and boil

an egg. We shall now proceed to explain how to chafe a rabbit. To chafe a rabbit you must have a chafing dish; hence, chafe. A rabbit is not a hare, although there may often be a hair in the rabbit. That, however, is immaterial.

A rabbit (correct, rarebit) is made of chrese. American cheese is preferred; limberger is deferred! Both limburger and roquefort are bad cheeses for rabbit, because they attract too much attention. Having created your atmosphere by procuring the cheese, you run it through a sausage-grinder, wheel No. 3, into a bowl, platter or derby hat. Magicians prefer derby hats.

You now add milk to suit, sorghum (New Orleans black strop) and a gill of kerosene. Cook slowly over a flame, or fire, as preferred, until it bubbles. Then add salt, pepper, mustard, caraway seed and mint. Stir hastily with a spoon until exhausted. Then pour on crackers, let stand until cool, throw into the garbage and open a can of sardines for the company. Warning: never eat a rabbit; rabbits are only to show off your rounded arm while working the chafing

To-morrow's lesson: 'How to Make Biscuits.'

## Charcoal Eph's Daily Thought.

"When a man gwine downhill," said Charcoal Eph, as he hooked a pickle, "everybody done git out'n de way; but of'n he gwine up yo' navah see nobody pushin'; no suh! Try some o' dishyer huckleberry, Mistah Jackson.

## Poor Punning.

Yon chap must drink a bitter cup And wear a frown, Because the boss just called him up To call him down.

## Relative.

"And you say," said the judge, "that you have known this man for years, and that he is temperate in drink?"

"Well, judge," said the witness, "what I do say is, I've never seen him so drunk he couldn't make a sign for another!"

As between the Czar of Russia, the Emperor of China and the Kaiser, we'd rather be the President of the United States!

Rathers.

## Ye Modern Girl.

"Mary! Mary! throw down that novel; get up off the couch and fix your hair. Here comes

"Goodness gracious, mother! Quick, let me have the broom and duster, and you go to bed with a headache!"

## The Movies.

If I had a chance to act in the movies, I'd like to be the fellow who comes home late from a party and makes his wife shudder. I hate realism, anyhow!

## Wishing.

Two hoboes on the park bench: "You know wot I wirht, Skinny?"

"Aw. wot?"

"I wisht I had t' git dis hole sewed up in me pocket, so me money wouldn't fall out!"

Fate. There are three roads: one leads ahead to fame, With rocks and tangles, and a fighting game.

One leads straight back, through forest glades of doubt: To take it, he who walks must turn about.

The third twists, turns and winds through prospects fair. But never seems to lead to anywhere.

And though we fight or faint, or win or lose, Man cannot stand-one of them he must choose

## Books and Authors

A few days before the fatal charge of Belloyen-Santerre, Alan Seeger, American poet-hero
of the Foreign Legion, wrote to a friend: "We
go up to the attack to-morrow. This will probably be the biggest thing yet. We are to have
the honor of marching in the first wave. No
sacks, but two musettes, tolle de tente slung
over shoulder, plenty of cartridges, grenades
and baionnette au canon. I will write you soon
if I get through all right. If not, my only early
care is for my poems. Add the ode I sent you,
and three sonnets to my last volume, and you
will have opera omnia quae existant. I am glad
to be going in the first wave. If you are in this
thing at all it is best to be in to the limit. And
this is the supreme experience."

On July 11 the Macmillan Co. will publish a new novel by Alice Brown, entitled "Bromley Neighborhood." Miss Brown has given the world many notable literary portraits, but perhaps none more remarkable than the heroine of this hook. Ellen, the repressed, self-conscious, yet deep-feeling. New England girl, who instinctively shrinks from everything connected with love, but to whom love comes in an instant and forever, is a distinct creation. Her story, a story which introduces a most interesting group of people, all splendidly delineated, is of intense appeal and told with the skill, the human sympathy, the artistry which one expects of the author of "The Prisoner." The eagerness with

Here is the creed that one who would know Here is the creed that one who would know more about birds must learn. It is Gene Stratton-Porter's creed, based on her own extensive experience with birds and set down in "Friends in Feathers," just published by Doubleday, Page & Co., an enlarged and revised edition of "What I Have Done With Birds," "In spirit, I say to the birds," writes Mrs. Porter, "trust me, and I will do by you as I would be done by. Your nest and your young shall be touched as I would wish some giant, surpassing my size and strength, as I surpass yours, to touch my cradie nest and your young shall be touched as I would wish some glant, surpassing my size and strength, as I surpass yours, to touch my cradle and baby. I shall not tear down your home and break your eggs or, take your little naked ones from your nest before they are ready to go, leaving them to die miserably. I shall come in colors to which you are accustomed, move slowly and softly, not approaching you too close until your confidence in me is established. I shall be more careful to feed your young what you feed them; drive away snakes and squirrels and protect you in every way possible to me. Trust me, and go on with your daily life. For what small disturbance is unavoidable among you forgive me, for through it I shall try to win thousands to love and to shield you."

#### Health Talks, by Dr. Wm. Brady (Copyright, 1916, National Newspaper Service.) How to Bent Old Nic.

Scientific physicians all agree that tobacco when used by minors, that is to say boys under twenty-five, causes a measureable reduction of mental and psysical efficiency. Every prac-ticing doctor knows that tobacco is a cause of hardening of the arteries. Good authorities believe that it favors lip, tongue and throat cancer. And the man on the street is well aware that it produces "heartburn." stomach trouble, disturbed heart function and catarrhal conditions of the throat. Some of the most distressing cases of angina pectoris (heart pang) are unquestionably caused by tobacco and re-lieved only when tobacco is given up. To-bacco amblyopia (toss of vision) is well know. I personally believe that tobacco, when used by boys under twenty-five, almost invariably leads to moral weakness. Therefore, as a doc-tor, I believe it should be made a very serious to have tobacco in his possession. I am speak-ing, if you please, not as a foe of tobacco, for I my pipe. I speak as a physician of ex-

perience. Some tobacco users can break the habit by an effort of the will. More require assistance So many readers have written for such assistance that it may be well to repeat here the neasures which have proved helpful in beating

old nicotine. 1. Adopt a diet without meat, fish or eggs for a period of not less than three weeks. (This includes meat soups). Meat extractives, being stimulating, whet the craving for tobacco.

2. Eat apples or other whole fresh fruits three

times a day. Fruit acids diminish the craving 3. Keep some good candy on hand and eat some when the desire for tobacco grows insistent. Sugar is an immediately available source of energy, and an antidote to alcohol and tobacco appetite.

4. Avoid the association of smokers.

5. Walk at least two miles a day, or take fifteen minutes of gymnastic exercise at home-

enough to get a little tired.

6. Rinse the mouth and gargle the throat night and morning with a very weak solution of silver nitrate—thirty grains (30) in a pint of distilled water, kept in an amber bottle away from the light. Use not over a tablespoonful at a

7. If your general condition warrants it, ask your doctor to prescribe an active tonic for temporary use, but beware of alleged tonics containing alcohol.

8. If the intestinal function is not active, take

every second morning a full dose of any saline cathartic—Epsom. Rochelle, Carlsbad salts, phosphate of soda, Seidlitz powder; magnesium citrate—it doesn't matter what saline.

Follow this regimen for three weeks and you will have consumed the behind the saline. will have conquered the habit.

### Questions and Answers.

The Bread and Milk Club.—It is a confession of weakness to print testimonials. But we feel it is a patriotic duty to acquaint our readers with some of the a complishments of the B, and M. Club, and we know of no better way than to quote brief extracts from letters written

by members of the club.
"I had suffered for many years from frequent sick headaches, several severe attacks every month. Since joining the B. and M. I have almost entirely recovered, seldom having even a slight headache now." When I had at last mastered the somersaults -a really credible thing, if you knew my bulk-

I became enthusiastic, and decided to give the Bread and Milk Club a whirl. Since adopting Blue Monday into my otherwise happy life I have lost about twenty pounds and gained a husband. I shall cheerfully serve a life sentence in the Bread and Milk Club!" N. C.
"... Accomplish more work with less fatigue

on Tuesday, after Blue Monday, than any other day in the week. Why not have two days of it each week, say Monday and Friday?" R. D. "A person never knows until he tries. That oppression and distress from gas has entirely gone, and I would gladly have paid \$100 for this Answer.-What did I tell you!

The Vagaries of Abdomens.—In inhaling should a person's abdomen go in or out? If a person's abdomen does not move when inhaling exhaling is that a sign that the person is not or exhaining is that a sign that the person is not breathing correctly?

Answer.—Watch a sleeping person and see. The diaphragm is a muscle resembling an inverted soup-plate. When it contracts, it lifts the abdomen or expands the abdomen, and draws air into the chest (inhalation). If a person's abdomen fails to expand when inhaling, that is a sign she should loosen her corset several notches and give nature a show. Women, from ages of abdominal splinting, breathe chiefly with the upper chest (as per the emotional scene in the movies). However, abdominal breathing is still physiological, and lack of it accounts for a lot of the peculiar sufferings of the splinted sex.

# News of Fifty Years Ago

(From the Richmond Dispatch, July 14, 1867.)

James Yarrington, an old and highly respected citizen of Richmond, died in his home last night, after a very brief illness. The Richmond Street Railway Company has hought, through George A. Ainslie, two elegant new cars from Wilmington, Del.

Married, on the 10th, at the residence of the bride's mother, by Rev. George Woodbridge, D. D., assisted by Rev. Joshua Peterkin, D. D., Captain Charles R. Skinker, of New York, late of Richmond, to Miss Rosa L., daughter of the late Joseph Allen, of this city.

The registration in Pittsylvania County, in-luding Danville, resulted in placing on the lists f voters the names of 1,147 whites and 1,977 The authorities of the Lynchburg and Dan-ville Railroad advertise twenty-five miles of that road to be let to contract.

A. S. Warfield, of Harrisburg, Pa., has purchased 300 acres of land and other property in Rockingham County, and will become a citizen of that county. It will be noticed that this Pennsylvania gentleman, in selecting a home place in Virzinia, took pains to locate in a county that has a large majority of white voters. Public baths are to be established in Ports-nouth, and Norfolk is already getting jealous General Logan, of Illinois, made a speech in

General Logan, of Hillous, made a speech in the House yesterday on the reconstruction acts in which he declared that he would have shot Mr. Davis had he been the officer who captured him in Georgia, and would hang him and all of his Cabinet row if he could. The Wisconsin Democratic Convention day before yesterday nominated Charles Flanderson for Governor of that State and adopted resolu-tions opposing negro suffrage in Wisconsin.

#### A NAVY FOR THE AIR BY FREDERIC J. HASKIN

WASHINGTON, July 12.—A warm dispute has developed in connection time of need, it has consistently backwith the new aircraft program, over the question of who shall be in charge of the heldful and operation of the aviation service, and several of its of the building and operation of our prominent members are represented en aerial navy. On the one hand, there of the building and operation of our aerial navy. On the one hand, there are those who want to see an aviation department established, similar to the War and Navy Departments, of equal rank with these, its head to sit in the cabinet as as tenth member. On the other side is the party opposed to the creation of such a department, and in favor of keeping the aviation scruice under the War and Navy Department members are represented en official committees and subcommittees. Its membership includes every licensed amateur and professional pilot in the United States to-day.

New Commission/Proposed.

The latest addition to this formidable array of agencies to administer and develop the aeroplane is a commission proposed in a resolution introunder the War and Navy Depart-

of a separate aviation department is the first to awaken the country to the importance of an adequate air service. Various members of both houses of Congress also favor the proposed department of aviation, as do numerous civilian authorities. A bill to create the department was introduced in Congress early in April, and now that the building program has been enormously in ing program has been enormously in-creased, with a corresponding increase in organization and detail work, sup-porters of the aviation department idea porters of the aviation department idea

War and Navy Departments.

Opposed to its Creation.

On the other hand, men in high positions, both official and civilian, are opposed to the creation of a separate department of aviation. Secretary Baker and Secretary Daniels appeared the secretary before a blown of the secretary before a blown. before a House committee considering the question, and while supporting the the question, and while supporting the new building program unconditionally, gave it as their opinion that the creagave it as their opinion that the creation of the new department at this time would be inopportune and not in the interests of efficiency. It is understood that they compared the project to the establishment of a submarine department, distinct from the Navy Department, or an artillery department distinct from the War Department. The airplane is a weapon either for sea war or land war, according to this view, and can best be co-ordinated with the work of other land or sea warnons by being the first the contents of the Council of National Defense. This advisory commission to the Council of National Defense. This advisory commission, by the way, is giving some concern to certain of our legislators. Appointed originally to advise the government it is to-day one of the most powerful organizations in the world. Through its subcommittees it can be subcommittees in the concern to certain of our legislators. Appointed originally to advise the government it is to-day one of the most powerful organizations in the world. Through its subcommittees it can be subcommittees it can be subcommittees in the concern to certain of our legislators. Appointed originally to advise the government it is to-day one of the most powerful organizations in the world. Through its subcommittees it can be subcommittees it can be subcommittees it can be subcommittees in the concern to certain of our legislators. Appointed originally to advise the government it is to-day one of the most powerful organizations in the government it is to-day one of the most powerful organizations in the government it is to-day one of the most powerful organizations. Appointed originally to advise the government it is to-day one of the most powerful organizations in the government it is to-day one of the government it is to-d of other land or sea weapons by being kept under the same supreme command.

So at this writing it is still uncertain so at this writing it is still uncertain whether we will have an aviation department to look after our aerial navy or not, but it does not seem probable. The views of the secretaries before the Military Committee were given in secret, but it is understood that a complete plan has been worked out to consider the secretary of the plete plan has been worked out to co-ordinate the existing aviation sections ordinate the existing aviation sections of the War and Navy Departments with other official agencies already existing and still others yet to be created, into an whole which will be capable of one whole, which will be capable of administering the aviation service no matter how large it may grow.

Attacked From Many Angles.
The existing agencies for developing

To look after the aviation service we have the War Department, as represented by the signal corps; the Navy Department, represented on three joint boards; the aircraft production boards, a subcommittee of the advisery com-mission to the Council of National De-

The board of aviation has been attacked in the This system of "interlocking director-past from numerous different angles, ates" insures co-operation. On the and also the need for welding all these different parts into a single whole. It should be remarked that these different agencies are working together very smoothly to-day, united by their common enthusiasm for the same cause.

To look after the aviation results.

plants for the building of the mon-ster air fleet.

The national advisory committee for acronautics is concerned with the study of the scientific problems of aviation. The committee is another example of the co-operation idea. It has for its chairman Professor Durand. a subcommittee of the advisory commission to the Council of National Defense; and the national advisory committee for aeronautics, which was created by act of Congress in March, 1915.

Besides these, the Department of Commerce is represented by in + Purell of Standards, which is overseeing a constantly increasing amount of the most important lests and research work. The Aero Clup of America is envolving those models by the thouse of the Council of America is envolving those models by the thouse models by the thouse models by the thouse models of aeroplanes; the aircraft production board with the problem of producing those models by the thouse producing those models by the thou-

The organization for the development of aviation is obviously somewhat loose. But in actual practice the different committees are so constituted that they achieve co-operation and harmony. Thus the national advisory committee alone includes representatives of five densityments. Inquiries regarding almost any topic, excepting on legal and medical subjects, are answered free. As all inquiries are answered directly by personal letter, a 2-cent stamp is required for return postage. Address The Fimes-Dispatch Information Bureau, Richmord, Va. not, we will get the aeroplanes.

Use More Milk.

To the Editor of The Times-Dispatch:
Sir.—Of all the foods, milk is one of
the most important. Yet the food value
of milk is far from being understood
by the people. The public mind has
been kept in a state of confusion as to
milk. Many have considered it only as
a beverage. It has been looked upon,
too, as infant food only, not "strong"
enough for adults. Milk is far from
being the popular food it ought to be.
Just recently, in the month of June,
the United States Department of Agriculture issued a bulletin dealing with
the great food value and economy of
milk and milk products, and showing the United States Department of Agriculture issued a bulletin dealing with the great food value and economy of milk and milk products, and showing milk to be an economical food even at a price of 15 cents per quart. In energy-giving powers, one quart of milk is equal to eleven ounces of sirloin steak, or three-fourths of a pound of round steak, or eight and one-half eggs, or 10.7 ounces fowl, says the bulletin. It is recommended that milk be largely substituted for eggs and meat. A pint of milk costing 6 cents supplies as much "building food" as two lamb chops costing 20 cents.

Milk will not support life continuously and indefinitely for adults, but will for infants. Adults must have bread and cereals and vegetables, and fruits, and these, associated with milk, will make a balanced diet.

Eggs and meat should not be eaten oftener than once a day, for too much protein brings autointoxication, headache, weakened vision, nervousness, etc.

ache, weakened vision, nervousness, etc.

The rule for rational feeding is, eat moderately of all good foods and very moderately of eggs and meat,

Milk should be given to children every meal, but once a day will keep them from physical deterioration.

With a rich supply of milk, plenty of butter and cheese, nations can laugh at starvation blockades.

MRS. N. E. STRAUCH.

Richmond, July 12.

I Held Your Heart.

In the dull afterglow of life's sunset, When there seems naught but memory and tears, And impotent reproach and black regret; You have the romance of that other

Like an old rose fast treasured in a Exhaling perfumes of the month of From some old garden dozing by a

day,

held your heart; our love was like So infinite it was, so wondrous deep. th, love, its very depth affrighted Like some abyss through which we was

plunge in sleep
And this one thought abides for aye with me-I held your heart; our love was like

the sea.

Edwin Carty Banck, in Washington
